Dynamic Design (Wednesday)

Wednesday classes will focus on creating dynamic design with each week being dedicated to a specific approach. We will explore value and shape massing, lines, edges, directional forces, repetition and unity to create engaging works of art.

Personal Color Expression (Friday)

Friday classes will focus on color. We all have a unique color vocabulary we are comfortable with but we often struggle with how to capture our intent in paint. Color choices, mixing, application, paint properties and using temperature to convey our story will be covered.

In each class, paint application techniques will be discussed and demonstrated, including brushwork and palette knife applications. Each class will begin with a brief demo followed by individual attention.

A detailed supply list will be provided upon registration.
